## PRODUCT AWARENESS AND CARE GUIDE Stainless Steel

Clean stainless steel at least once a week.

Always apply stainless steel cleaner/polish with a nonabrasive cloth or sponge, working with, not across, the grain.

Do not use steel wool, wire brushes or abrasive sponge pads. Use only non-scratch cleaning pads.

Cleaners containing chloride (bleach) are not recommended. If used, rinse the surface immediately to prevent corrosion.

Most stainless steel products will scratch from everyday use. However, these scratches will blend over time to create a unique finish.

Do not store open containers of cleaners or chemicals such as acids, bleach, sodium chloride, lye, toilet bowl cleaner, drain cleaner, or hard water stain removal products under your sink.

Success with cleaners and procedures is dependent upon such factors as the hardness and temperature of the water, using exact measurements of ingredients, changes in cleaning formulas and the condition of the product being cleaned. Since there are variations within these factors, Kohler cannot guarantee the effectiveness of the formulas mentioned.

### **Care Tip**

Allowing water to evaporate on metal will form water deposits. To avoid this and keep your product looking beautiful, it is important to wipe the sink clean with a soft cloth after each use

### **Products to Consider**

Fantastik Antibacterial Heavy Duty  
Formula 409 Antibacterial All Purpose  
Windex Original  
Bar Keeper's Friend Soft Cleanser  
Stainless steel cleaner & polish

### **For rust removal:**

Autosol Rust Remover  
Bar Keeper's Friend MORE Spray & Foam Cleaner
